How To and Troubleshooting Guide for 10.25" Wireless Touch Display

Includes Safety and Usage Information

219704725

Original Instructions

 WARNING

Indicates a potential hazard which, if not avoided, could result in serious injury or death.

 WARNING

Keep this supplemental information guide with the vehicle at all times.

 WARNING

Operating, servicing and maintaining an off-road vehicle can expose you to chemicals including engine exhaust, carbon monoxide, phthalates, and lead, which are known to the State of California to cause cancer and birth defects or other reproductive harm. To minimize exposure, avoid breathing exhaust, do not idle the engine except as necessary, service your vehicle in a well-ventilated area and wear gloves or wash your hands frequently when servicing your vehicle. For more information go to www.p65warnings.ca.gov/products/passenger-vehicle.

INTRODUCTION

This guide is divided into two main sections:

- How To: Provides step-by-step instructions to help you get the most out of each app and its features.
- Troubleshooting: Provides easy-to-follow steps to help you resolve unexpected issues.

NOTE

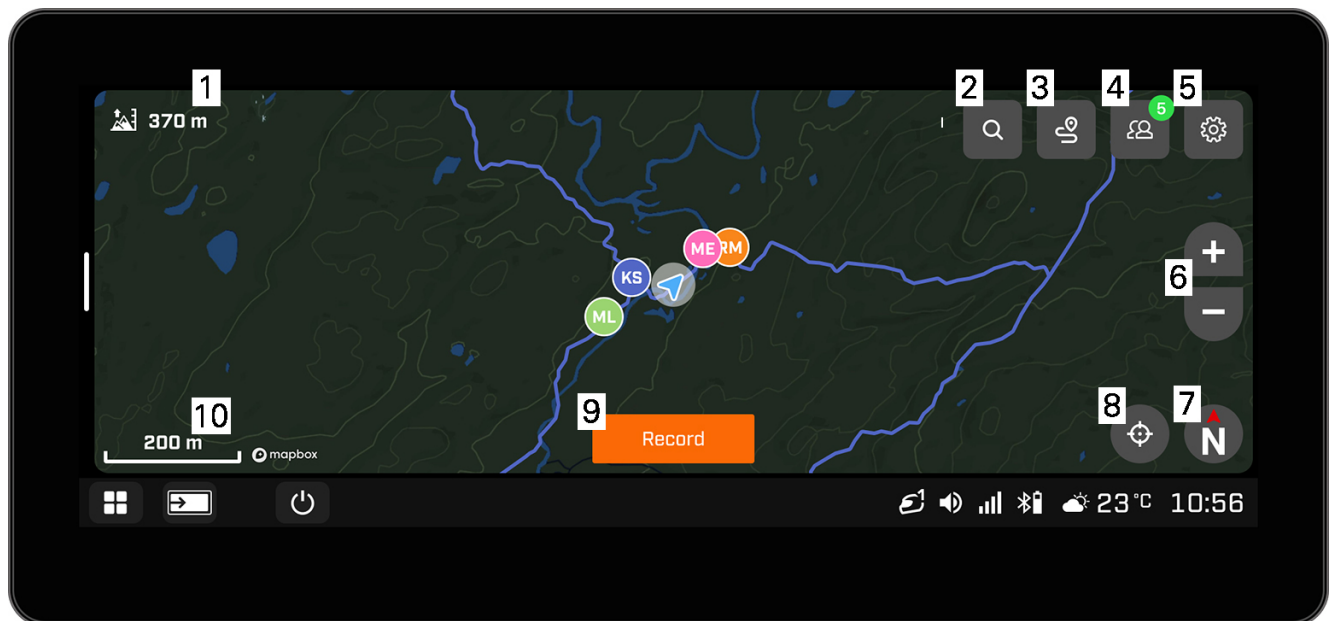

If you have a question about a specific app or feature, refer to the corresponding section in the *How To* part of this guide (for example, see *Navigation* for information on the Navigation app and its features). If you continue to experience an issue after completing all the steps in the relevant *How To* section, refer to the *Troubleshooting* section for additional guidance.

APPLICATIONS

Watch this [video](#) for an overview of the display's apps and functions.

HOW TO

NAVIGATION

1. Altitude
2. Points of Interest
3. Rides
4. Groups
5. Map Settings
6. Zoom In/Out
7. Compass (Lock North Up)
8. Recenter
9. Record Ride
10. Scale

NOTE

The Navigation app offers a pre-downloaded map that includes points of interest and official ORV trails in supported regions. This embedded experience offers multiple essential functionalities to help you get where you need to go. Unlock an enhanced navigation experience by wirelessly transferring data from the *BRP GO!* app to your vehicle via Bluetooth to easily send itineraries and custom points of interest to your display, and keep official ORV trails up to date on your map.

How to Record a Ride

From the display:

You can select the *RECORD* button at the bottom of the screen to record a ride. When you stop the recording, a summary with relevant ride stats can be accessed by:

1. Selecting the *RIDES* icon,
2. Pressing *COMPLETED RIDES*.

From here, you can also rename or delete a recorded ride by selecting it.

How to Create an Itinerary

Itineraries must be created in the *BRP GO!* app and transferred to the display via Bluetooth. Transfer procedure is detailed later in this document.

To create an itinerary in the *BRP GO!* app on your phone:

1. Go to the *NAVIGATION* tab
2. Press the *RIDES* icon on the top left (below the search bar)
3. Select *CREATE ITINERARY*
4. Drag the marker on the map to your desired starting point. You can tap the *Search* icon to choose from an official POI or a custom POI
5. Press *START HERE*
6. Select *+STEP* to add another waypoint to the itinerary. You can tap the *Search* icon to choose from an official POI or a custom POI
7. Press *ADD TO ITINERARY*
8. Repeat *+STEP* selection until your desired itinerary is created
9. Select *NEXT*
10. Tap the 3 dots on the top right if you'd like to rename the itinerary, share it, add it to a group, duplicate it, or delete it
11. Select the arrow on the top left to save the itinerary for later

From the display:

Once your itinerary has been transferred to the display via Bluetooth, select the *RIDES* icon and you can quickly access your itinerary.

How to Search Points of Interest

From the display:

1. To search for points of interest, select the *POINTS OF INTEREST* icon to see a list of gas stations, restaurants, BRP dealerships, and more! Custom points of interest can be found under *My Places*.
2. Press a specific point of interest and choose *NAVIGATE TO* to head directly to it.

How to Save a Custom Location

From the display:

1. Push and hold the location on the map,

2. Select *SAVE*.

How to Transfer Data From the BRP GO! App to the Display

Data transfer is made via Bluetooth. Therefore, your phone must be paired to the display via Bluetooth. To do so, go to: Settings > Connect > Bluetooth > Phone > Pair New Device.

Update Official ORV Trails & Points of Interest

If you do not see the *Start Your Journey* window, Select the *Map Settings* icon (top right of the map) and press *AUTO-IMPORT BRP GO! DATA*.

If you see the *Start Your Journey* window on the top left of the display, proceed as follows:

On your phone:

1. Scan the QR code that appears under *UPDATE TRAILS & POI* to download the *BRP GO!* app.
2. Open the *BRP GO!* app and sign in or create an account.
3. Scan the same QR code to open a list of regions.
4. Select the regions you want to receive official ORV trail and points of interest updates for.
If you do not plan on riding in any of the regions listed, select *SKIP THIS STEP* under the QR code on the display and skip to *Transfer Itineraries & Custom POI* from the *BRP GO!* App to the display below.
5. Press *DOWNLOAD & TRANSFER*. You should see an orange circle on your display indicating that Trails & POI are being synchronized. A green check mark will appear when the transfer is complete.

In the future, follow the steps below to transfer official ORV trails & POI updates to the display:

From the display:

1. Pair your phone via Bluetooth.
2. Open the *Navigation* app.

On your phone:

1. Open the *BRP GO!* app (ensure you are signed in to your account).
2. Select the *OFF-ROAD* playground from the *Map Details* (top right of Navigation tab).
3. Scroll down and press *SELECT REGION*.

NOTE

Make sure the region(s) you want to update are listed under *Off-Road*.

4. Choose *CHECK UPDATE* under *TRANSFER TO VEHICLE*.

Transfer Itineraries & Custom POI from the BRP GO! App to the Display.

If you've already created an itinerary or custom point of interest in the *BRP GO!* app's *OFF-ROAD* playground, under *IMPORT ITINERARIES & MY PLACES* on the display, you can:

- Select *ACTIVATE AUTO-IMPORT* to transfer them to the display (from now on, when your phone is connected to the Display via Bluetooth and the app is open, new itineraries and custom POI will transfer automatically).
- Select *NEVER IMPORT* (you will have to perform the steps under *Update Official ORV Trails & Points of Interest* above again if you'd like to activate this feature).

How to Create or Join a Group Ride

From the display:

1. Select the *GROUPS* icon.
2. Press *SHARE POSITION*.
3. Save your desired initials.

To create a group:

When the prompt appears to enter the group code:

1. Enter a 4-digit code of your choice.
2. Press *JOIN*.
3. Share the group code (4-digit code you entered) with your riding crew.

To join a group:

When the prompt appears to enter the group code:

1. Enter the group code shared with you,
2. Press *JOIN*.

To hide non-group members on your map.

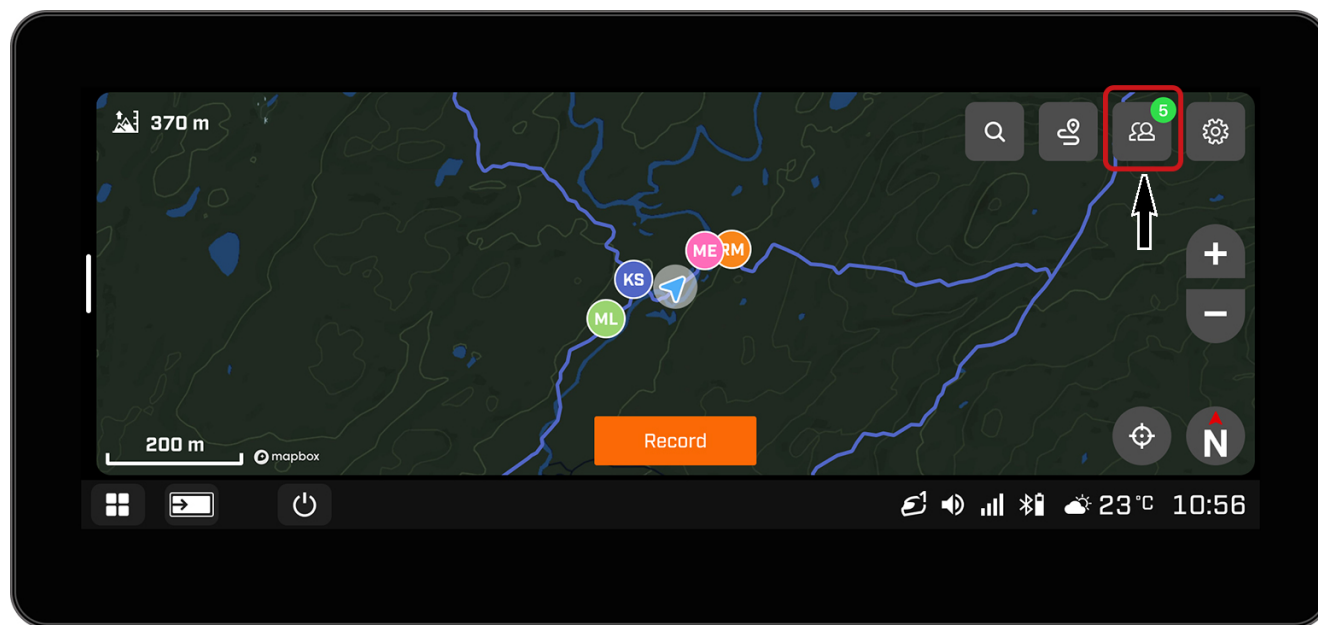

1. Select the *GROUPS* icon,
2. Toggle *SEE GROUP MEMBERS ONLY* to *ON*.

NOTE

- Works with BRP vehicles with the 10.25" Wireless Touch Display (MY27) or the 10.25" Touch Display (MY24 and up) if GPS module with Group Ride is installed. In supported regions only.
- Works within a range of 1+ mile or 1.6+ km.
- Group members will appear on the map as a coloured icon and non-group members (other BRP vehicles) will appear as a black icon.
- Friends added to groups in the *BRP GO!* app are independent from groups joined/created on the vehicle display.

IMPORTANT

If the Groups icons submenu does not appear after selecting the button, follow the steps in the *How to Reboot the Display* section.

GROUPS ICON

Completed Rides and My Places Do Not Transfer to the BRP GO! App From the Display

It is not possible to transfer Completed Rides and My Places saved directly on the display to the *BRP GO!* app. They stay saved in the display only.

Groups Created on the Display (Through Group Ride) are Independent From Groups in the BRP GO! App

Group Ride works on BRP vehicles equipped with the 10.25" Wireless Touch Display (2027 and up) and the 10.25" Touch Display (2024 and up) only if the *GPS module with Group Ride* is installed. Group Ride is independent of the friends tracking feature in the *BRP GO!* app.

Group Ride Availability

Group Ride currently works in Andorra, Austria, Belgium, Bulgaria, Canada, Colombia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Malta, Mexico, Netherlands, Norway, Philippines, Poland, Portugal, Puerto Rico, Romania, Saudi Arabia, Slovakia, Slovenia, South Africa, Spain, Sweden, Switzerland, Turkey, United Arab Emirates, United Kingdom, and the United States of America.

Long Press on the Display's Map to Create a Custom Point of Interest

To create/save a custom point of interest, the user must long press on the map. If it is saved, it can be found under *My Places* in the *Points of interest* menu of the Navigation app.

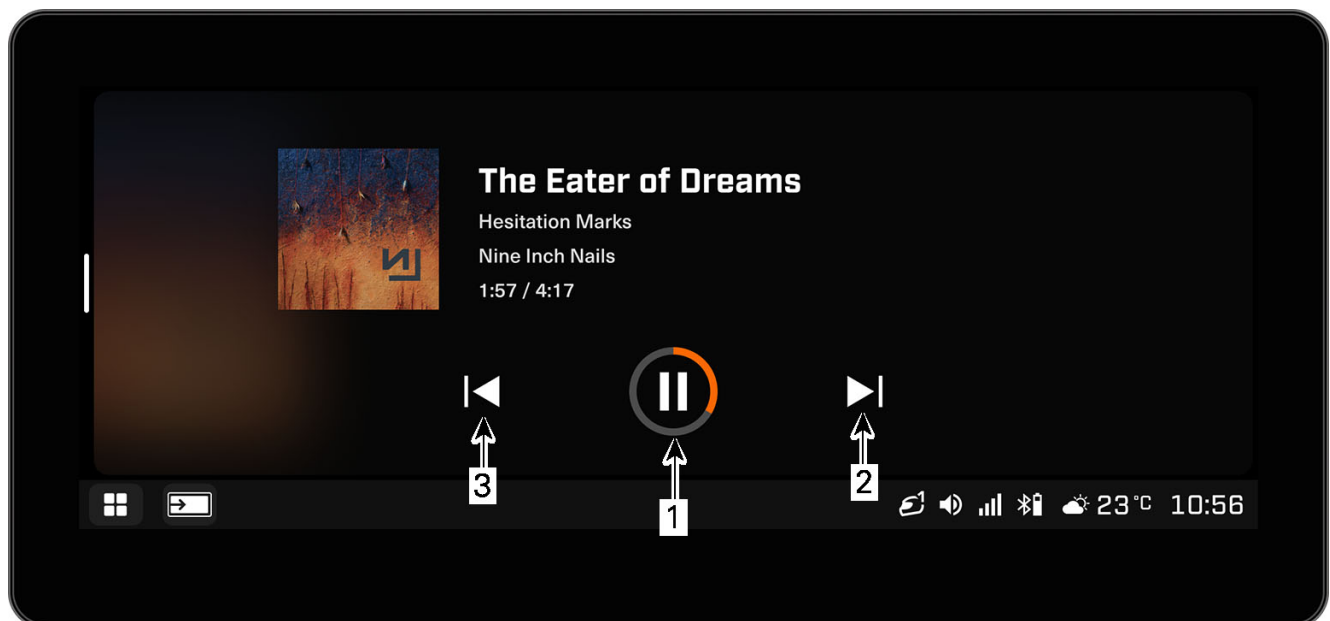

Cannot Save a Custom Point of Interest While Riding

Creating/saving a custom point of interest is not possible while recording a ride or following an itinerary on the display. To do so, you need to stop your ride recording or your itinerary, save your point of interest and restart your recording or itinerary.

ORV Trails Missing in a Specific Region

Official ORV trail data is not available in all regions. Therefore, some regions will not have trails displayed and will not be included in the list of regions to select in the *BRP GO!* app.

MEDIA

1. Play / Pause
2. Skip Forward
3. Skip Previous

NOTE

To listen to media, a phone must be paired to the display via Bluetooth.

How to Play, Pause, or Skip

From steering wheel controls: Short press the VOLUME switch to Play/Pause, short press UP on the Up/Down/OK switch to go to the next song, short press DOWN on the Up/Down/OK switch to go to the previous song.

From the Display: Use the Next, Previous, and Play/Pause buttons.

How to Adjust Volume

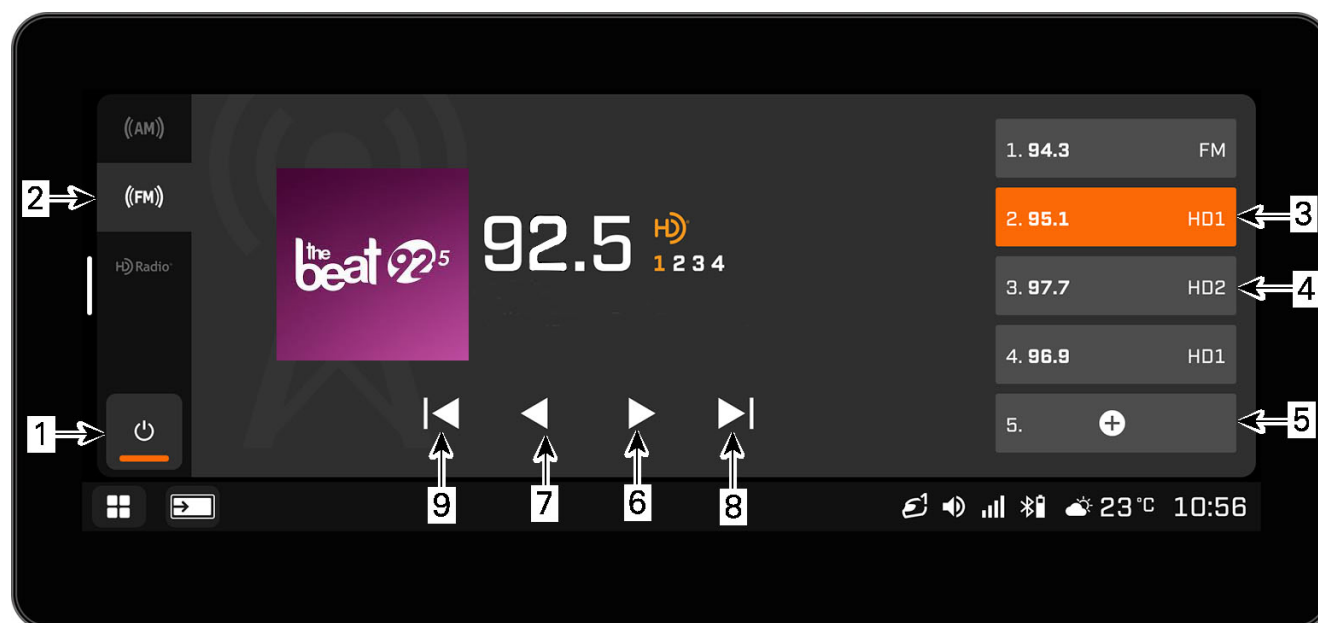

Push up or down on the volume switch on the steering wheel or the dedicated switch below the gear selector.

How to Control Audio Equalizer

From the Display:

1. Settings,
2. Audio,
3. Equalizer.

RADIO

1. Power
2. Source (AM, FM, HD)
3. Selected Preset
4. Preset
5. Empty Preset Slot
6. Tune Next
7. Tune Back
8. Seek Next
9. Seek Back.

How to Power ON/OFF

From the steering wheel controls: Short press OK to power On.
From the display: Press the *Power* icon at the bottom left of the to power ON or OFF.

How to Activate HD Radio

- From the display:
- 1. Select the *HD Radio* icon from the menu on the left,
 - 2. Toggle ON.

 NOTE
HD Radio is only available for FM stations.

How to Tune and Seek

From the steering wheel controls: Long press UP on the Up/Down/OK switch to seek the next station, long press DOWN on the Up/Down/OK switch to seek the previous station.
From the display: Use the Tune and Seek buttons.

How to Adjust Volume

Push UP or DOWN on the volume switch on the steering wheel or the dedicated switch below the gear selector.

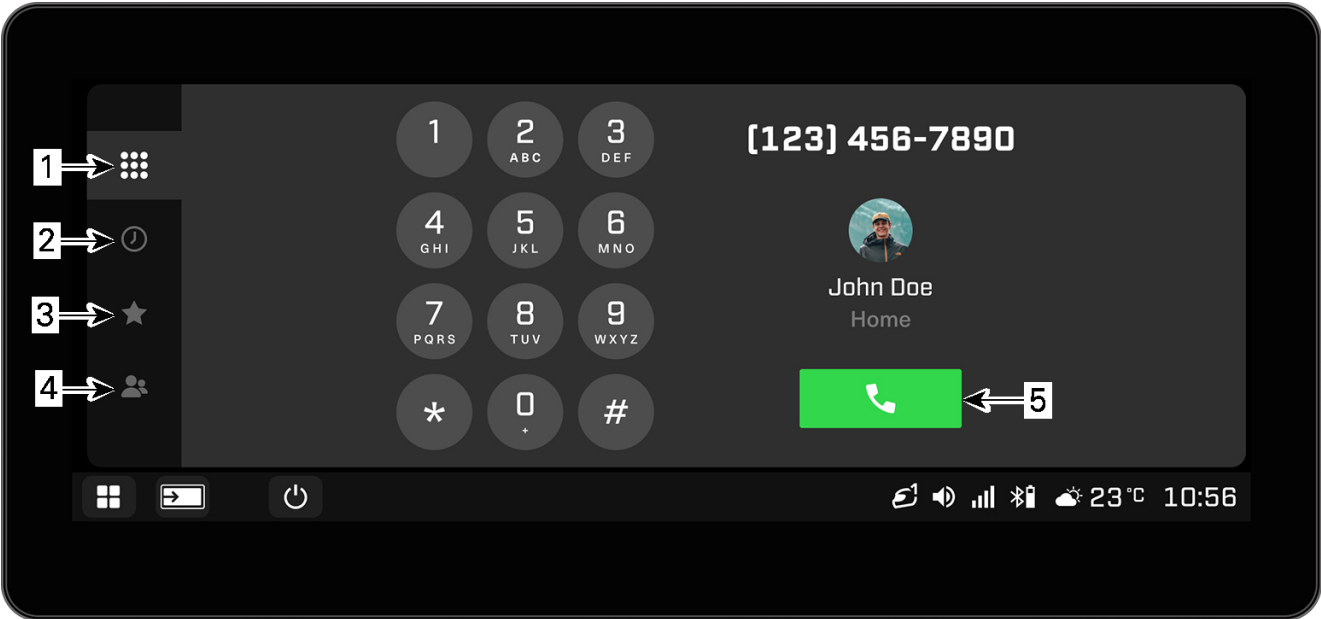

How to Save Presets

From the steering wheel controls: Short press UP or DOWN on the Up/Down/OK switch to highlight a saved preset slot and short press OK to select a preset added to a slot. Long press OK to save the current station at the highlighted preset slot.
From the display: Long press a preset slot to save the current station.

No DAB Radio Available

In North America, AM & FM radio is available. In Europe, DAB Radio is not supported for 2027, only FM is available.

PHONE

- 1. Keypad
- 2. Recents
- 3. Favorites
- 4. Contacts
- 5. Answer

 NOTE

To place and receive phone calls, a phone and a headset must be paired to the display via Bluetooth.

Phone Calls Without Headset Connected

If a phone is paired via Bluetooth and you receive a phone call, but you do not have a headset paired, you will not be able to talk during the phone call since the vehicle doesn't have a built-in microphone. You will need to switch the audio source to Speaker on your phone after accepting the call.

 WARNING

Receiving a phone call can distract from the operation of the vehicle, particularly from constantly scanning the environment. NEVER accept a phone call on an electronic device or phone, unless using paired headset. ALWAYS bring the vehicle to a complete stop in a safe area.

How to Make a Phone Call

From the display:

- 1. Select: KEYPAD, RECENTS, FAVORITES, or CONTACTS.
- 2. Select the person to call or initiate call after typing in a phone number on the keypad.

How to Receive a Phone Call

From the steering wheel controls:

- 1. Short press UP or DOWN on the Up/Down/OK switch to highlight *Answer Call* or *Decline Call* buttons.

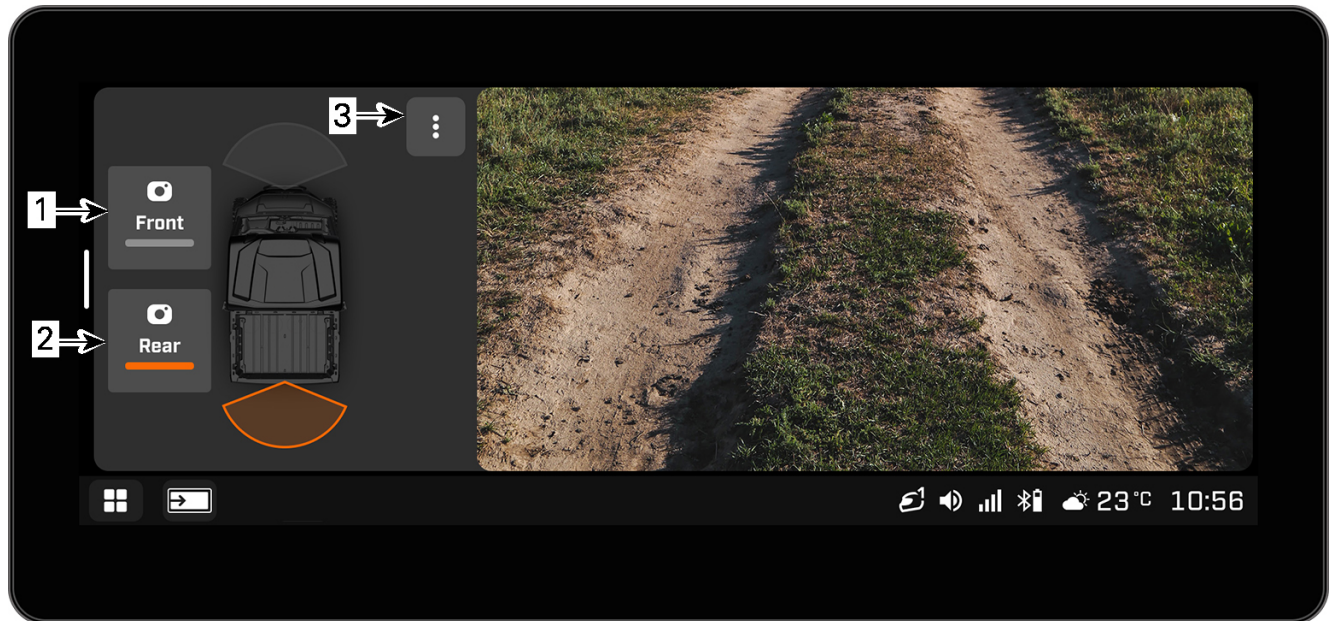

2. Short press OK to confirm selection.

From the display: Press the *Answer Call* or *Decline Call* button.

REMEMBER

- BRP vehicles are not equipped with microphones.
- Make sure your headset is connected via Bluetooth and has a built-in microphone.

CAMERA

1. Front Camera Icon
2. Rear Camera Icon
3. Three dots Icon

How to Switch Between Available Views

From the steering wheel controls: Short press UP or DOWN on the Up/Down/OK switch.

From the display: Select the Camera icons.

NOTE

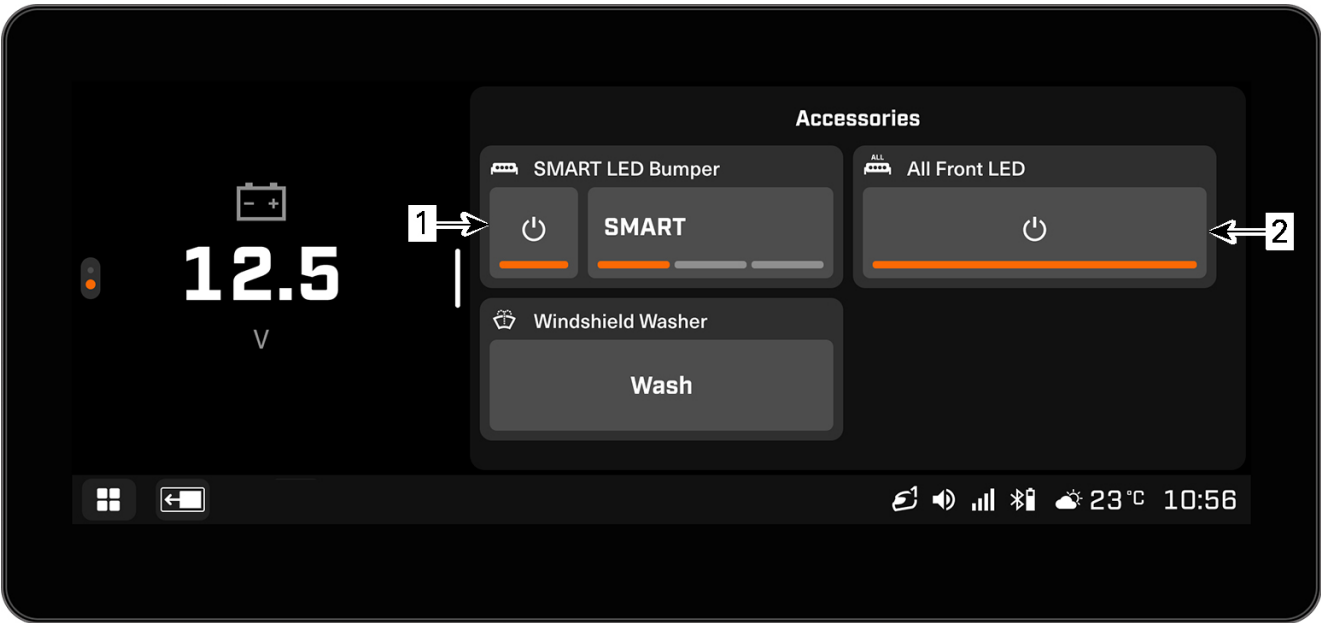

Front camera is available on select packages or as an accessory.

How to Enable the Camera at Any Speed

From the display:

1. Select the three dots at the top right.
2. Toggle *Always Enabled* to *ON*.

ACCESSORIES

TYPICAL

- 1. Smart LED Bumper Power Icon
- 2. All Front LED Power Icon

NOTE

To manage accessories from the display, the Accessory Control Module must be installed on the vehicle.

How to Set Up Accessories on the Display

- 1. Settings,
- 2. Vehicle,
- 3. Accessories,
- 4. Add Accessory,
- 5. Select the accessory from the list,
- 6. Choose *INSTALL*.

How to Control the Accessories

Once added, accessories can be turned ON or OFF using the *Power* icon within the *Accessories* app. Some accessories also include additional controls, such as adjustable heat levels for a heated driver seat, which are all manageable using the display.

How to assign SMART Accessories to Specific Buttons of the SMART Control Center

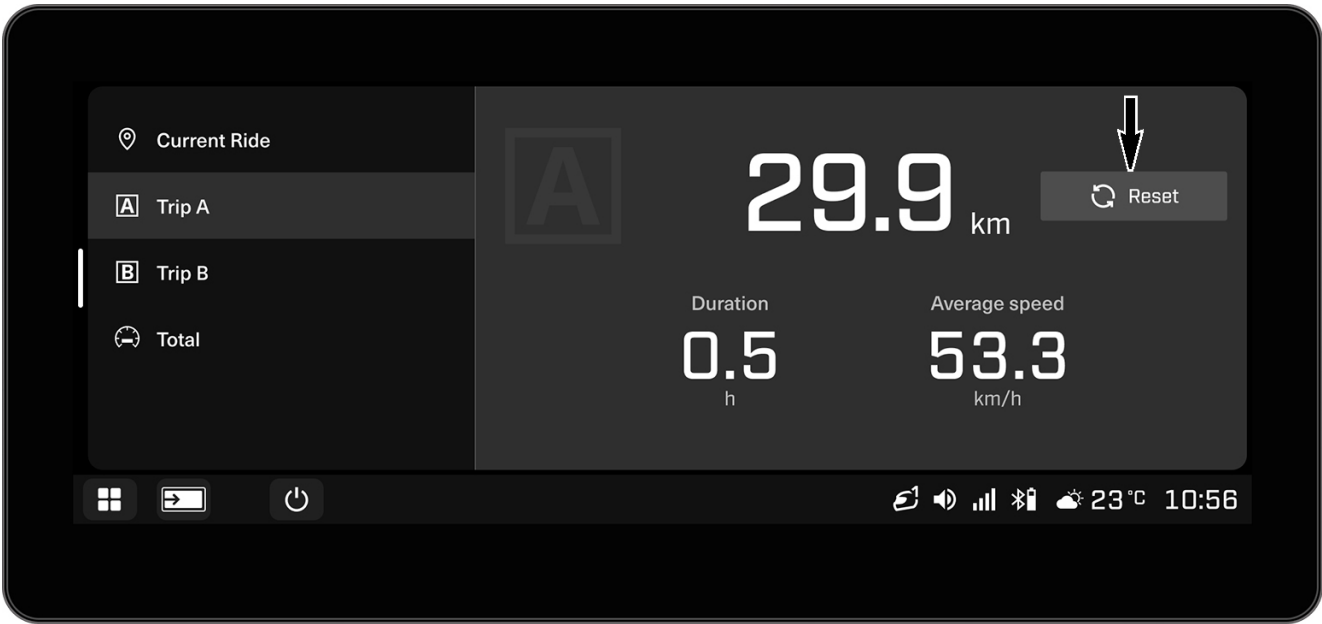

From the display:

- 1. Settings,
- 2. Buttons,
- 3. Smart control center.

DPS Mode Cannot Be Changed When a Track Kit is Installed

When a track kit is installed on the vehicle, the DPS mode is set to a specific track kit mode. Therefore, the DPS mode cannot be changed.

STATISTICS

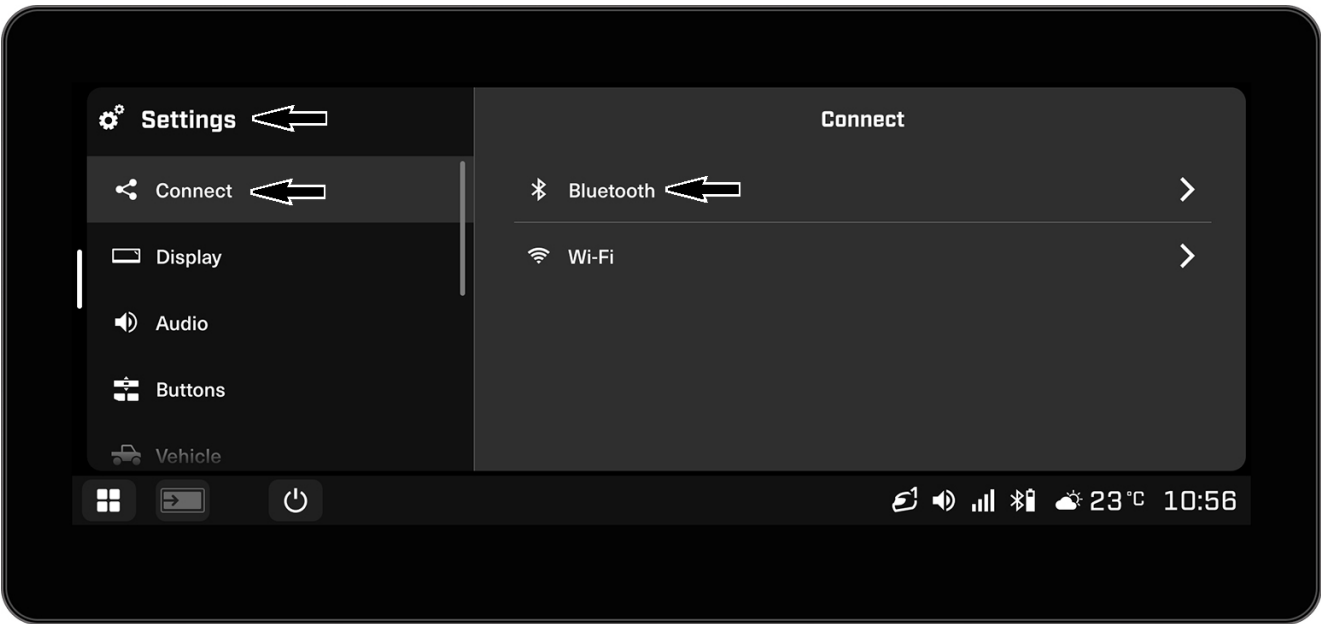

How to Reset Trip Data

From the steering wheel controls: Long press the *OK* button.

From the display: Select *RESET* button [1].

NOTE
You can manually reset Trip A or Trip B. The Current Ride statistics will automatically reset at key-off.

SETTINGS

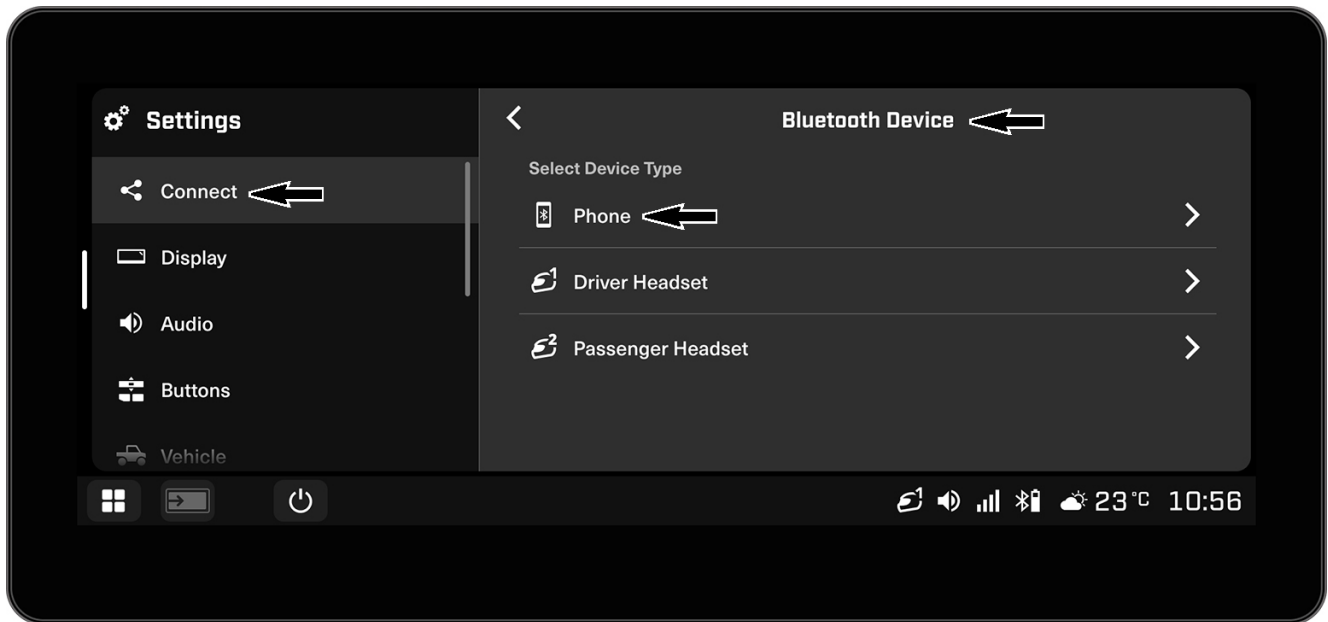

How to Pair a Phone via Bluetooth

✎ NOTE
The Bluetooth menu can also be opened by long-pressing the <i>Bluetooth</i> icon in the status bar.

From the display:

1. Settings,
2. Connect,
3. Bluetooth,
4. Phone,
5. Pair New Device.

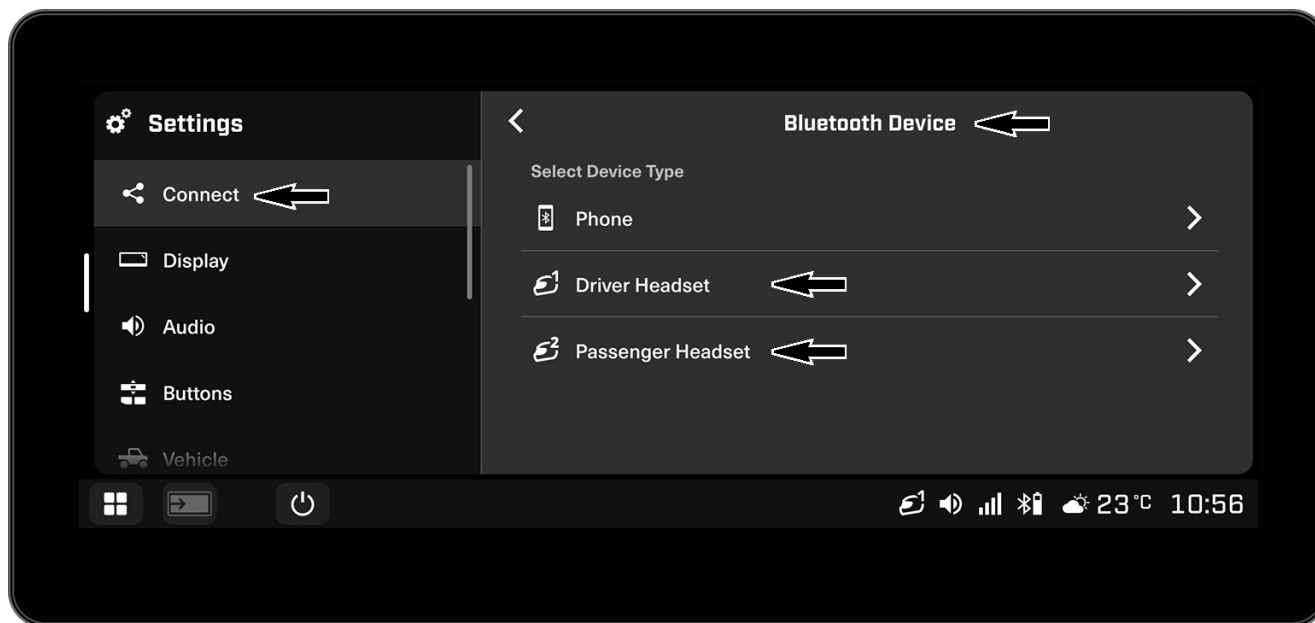

NOTE

- Only one phone can be paired at a time. If a phone is already paired to the display via Bluetooth and you want to pair a different phone, you must remove the current pairing before pairing a new phone.
- You may receive a disconnection notification or the status bar may indicate that Bluetooth is disconnected even though the phone remains connected. Verify the connection status in the Bluetooth menu.
- Headsets may not reconnect automatically after starting. If this occurs, re-pair the headsets to the display.

How to Pair a Headset via Bluetooth

From the display:

1. Connect,
2. Bluetooth Device,
3. Driver Headset or Passenger Headset,
4. Pair New Device.

NOTE

- Only the Driver Headset will be able to speak during phone calls.

IMPORTANT

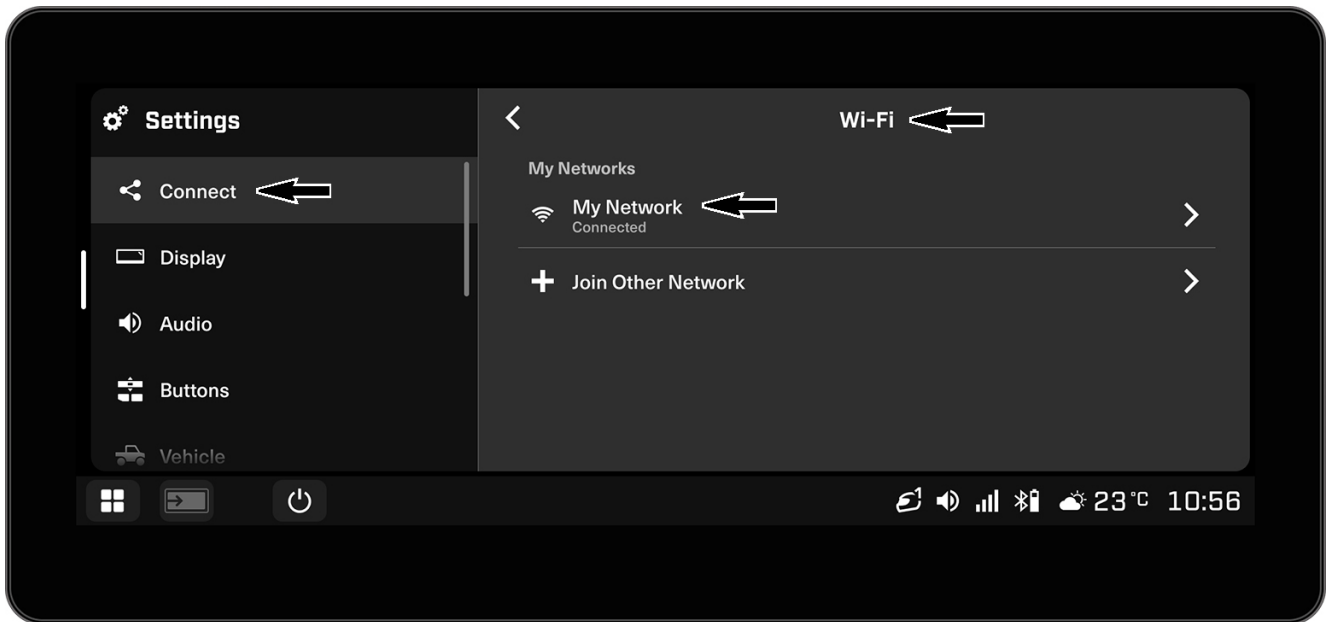

What to do if I cannot connect my phone or headset via Bluetooth:

- Clear Bluetooth connection both on phone and on the display.
- Create the Bluetooth connection from the display and not from the phone.
- The display supports the following smartphones : All iOS and Android phones with Bluetooth 4 (Apple, Samsung, Google, OnePlus, Motorola, etc).
- The display supports the following communication systems:
 - Cardo : Freecom 4X, Packtalk Edge.
 - Sena : 10C Pro, 5S, 50R, 50S.
 - Nolan : N-Com B901R, B902R, B903R.
 - BRP : Vibe & Vibe universal.

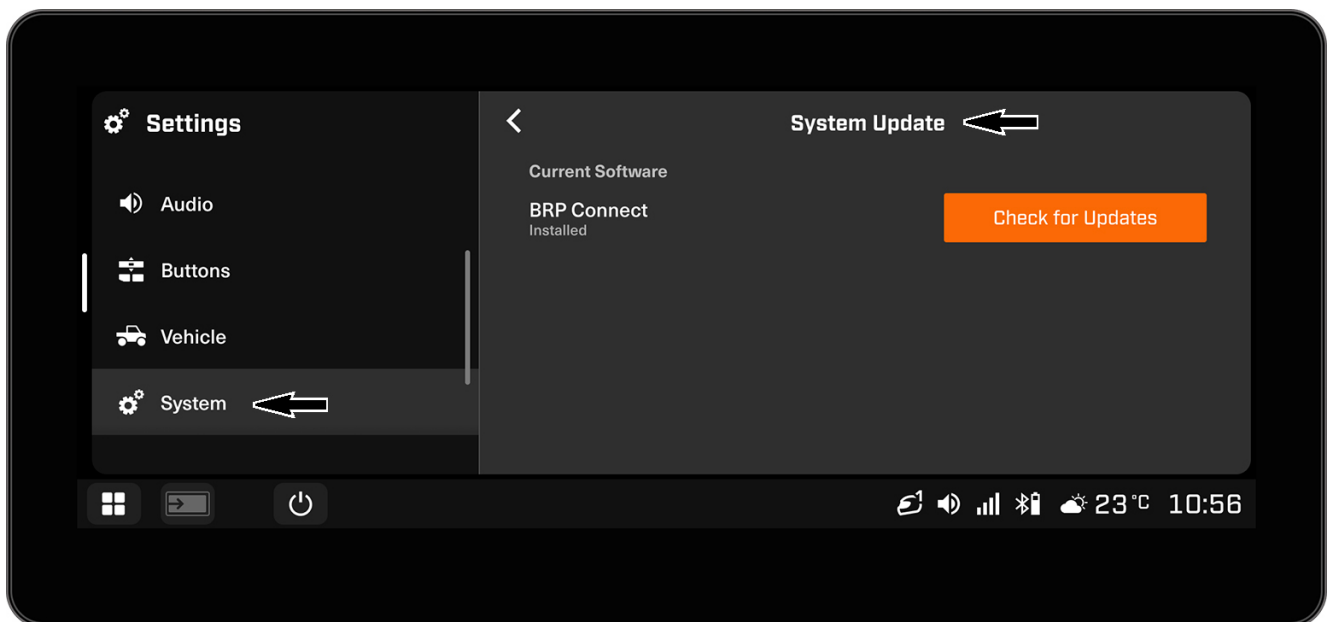

How to Perform a System Update

Connecting the display to a Wi-Fi network allows it to update to the latest system version and benefit from the latest features and improvements.

From the display, connect to Wi-Fi (or mobile hotspot):

1. Connect,
2. Wi-Fi,
3. Connect to a Wi-Fi network or a mobile hotspot,
4. Perform the update,
5. System,
6. System Update.
7. Check for Updates.
8. Follow the on-screen steps to download and install.

 NOTE

Wi-Fi network requires a password.

IMPORTANT

BRP recommends connecting the vehicle's battery to a charger during updates, since the update could take at least 40 minutes.

How to Adjust Brightness or Appearance of the Display

From the display:

1. Select: Settings > Display
2. Move the sliders next to each display's name to adjust the brightness,
3. Select the Dark, Light or Auto option beside Appearance.

How to Reset Maintenance

1. Select: Settings > Vehicle > Maintenance > Reset

How to Manage Audio Settings

From the display, the Audio menu allows you to:

- Choose the audio output,
- Adjust the volume level,
- Access more advanced sound settings like Equalizer, Fade, Balance and Audio Configuration.

 NOTE

If the vehicle's audio system seems to not be working properly, ensure that:

1. The audio output is set to Speakers: Settings > Audio > Output > Speakers.
2. The audio configuration is set to the right level of the audio system: Settings > Audio > Audio Configuration.

How to Choose Which Apps Appear After Pressing the App Switcher Button

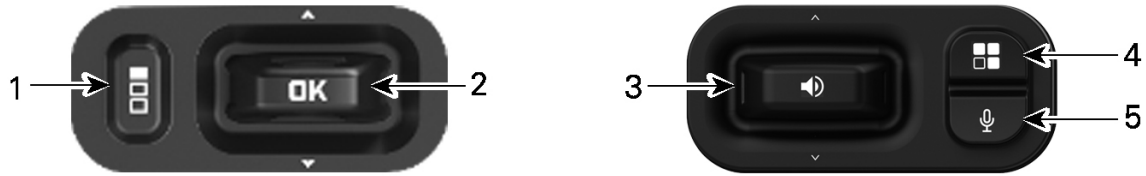

From the display:

1. Select: Settings > Buttons > App Switcher Manager,
2. Toggle desired apps to ON,
3. Reorder by pressing and dragging the 3 lines icon.

 NOTE

Up to five apps can be selected for the App Switcher.

STEERING WHEEL CONTROLS

1. Ride Settings button
2. Up/Down/OK
3. Volume button
4. App Switcher button
5. Microphone button

Steering Wheel Microphone Button

The Microphone button on the steering wheel currently has no function. A system update may bring future capabilities.

How to Use App Switcher

Short press: Change the app being shown.

Long press: Show or hide widgets.

How to Use Volume Switch

With *Media* app open:

- Short press middle of button = Play/Pause.
- Up/Down = Volume.

With *Radio* app open:

- Short press middle of button = ON/OFF.
- Up/Down = Volume.

How To Use Ride Settings Button

- First short press makes the Ride Settings appear.
- Subsequent short presses (with menu open) change the displayed Ride Setting.

How to Use Up/Down/OK Switch

With *Media* app open:

- Short press Up = Next track.
- Short press Down = Previous track.

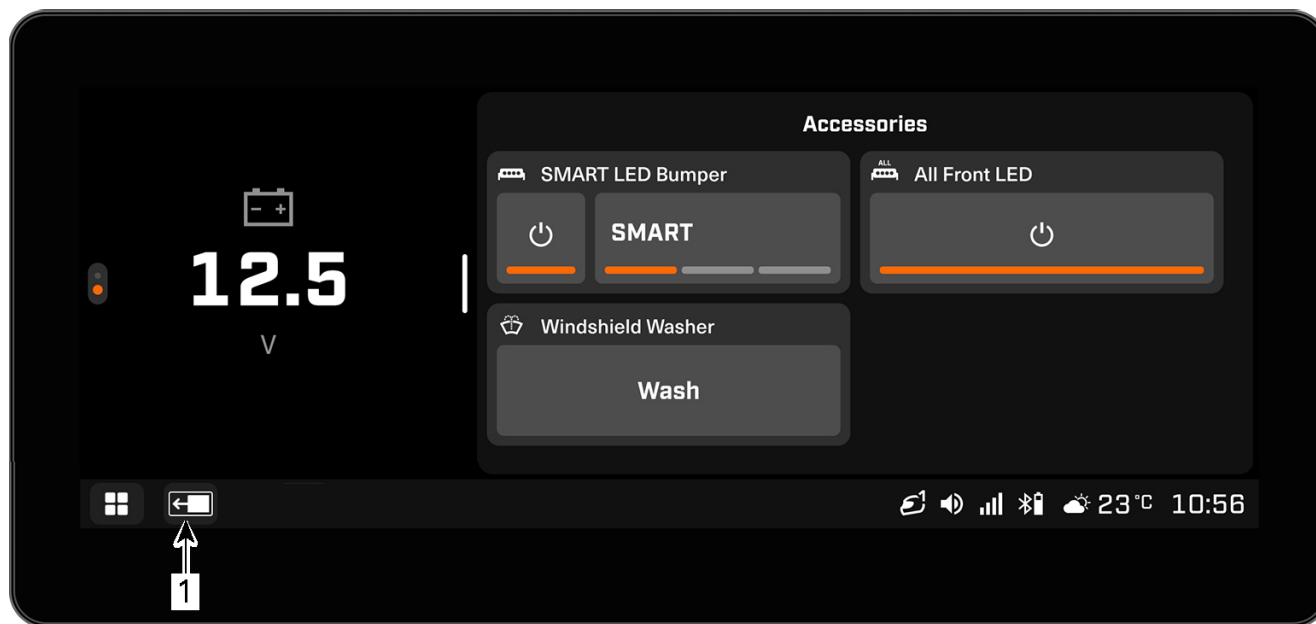

With *Radio* app open:

- Short press OK = Power Radio ON / Select Preset.
- Long press OK = Save station to highlighted preset.
- Long press Up = Seek next.
- Long press Down = Seek previous.
- Short press Up/Down = Highlight preset.

With *Phone* app open:

- Short press Up/Down = Select Answer/Decline incoming call.
- Short press OK = Confirm selection of Answer/Decline incoming call.

WIDGETS

1. Layout button

How to Show / Hide Widgets

From the steering wheel controls:

- Long-press the *App Switcher* button.

From the display:

1. Select the *Layout* button or swipe right from the left side of the display,
2. Swipe UP or DOWN to view the available widgets.

How to Manage the Speed Limiter

From the display:

1. Show Widgets and select Speed Limiter,
2. Select ON/OFF button,
3. Use the Up and Down arrows to increase or decrease the speed limit.

NOTE

When reactivated, the speed limiter uses the current speed instead of the previously set speed.

Speed Limiter Only Accessible via Widget

The speed limiter function is only available by opening the widgets on the display.

Speed Limiter Range

Vehicles equipped with the 10.25" Wireless Touch Display feature a speed limiter that is adjustable from 5 to 20 MPH (8 to 30 km/h), which is intended for low-speed, work and utility tasks.

TROUBLESHOOTING

Starting Time

On the first key on, the vehicle's display will require approximately 60 seconds to load some apps.

Outdoor Temperature Is Not Shown on the Display's Status Bar

The outdoor temperature is only shown when the vehicle is equipped with HVAC.

Fault Codes Not Available on the Display

Fault codes and fault descriptions are currently not available on the display.

Phone Cannot Be Paired

If a phone is already paired to the display via Bluetooth and you want to pair a new phone, you need to delete the current pairing to allow a new pairing. Only one phone can be paired at once.

Sound Is Not Coming Out of Audio System

Verify that:

1. The audio output is set to Speakers: Settings > Audio > Output > Speakers.
2. The audio configuration is set to the right level for the audio system: Settings > Audio > Audio Configuration.

Media and Radio Playing Simultaneously

Media and Radio can play simultaneously. If this happens, simply pause the one you do not want to listen to.

How to Reboot the Display

1. Turn the ignition OFF.
2. Wait at least 60 seconds.
3. Turn the ignition ON again.

NOTE
If a bug is still being experienced, remove and reinstall the fuse, as mentioned in the <i>Operator's Guide</i> .
